

MUNICIPAL OBSERVATORY OF EDUCATION

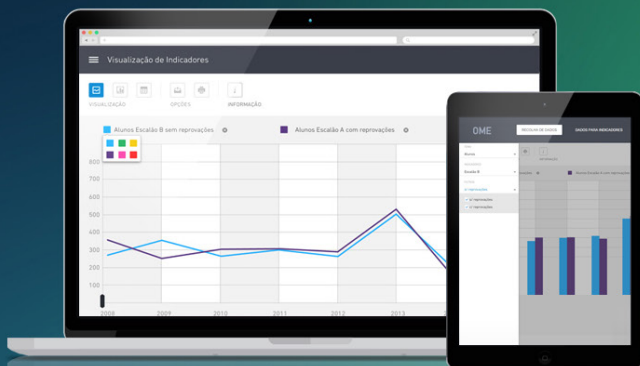

Provide credible educational information is the aim of Municipal Observatory Education (MOE), a complete suite of analysis and data collection that enables Municipalities to monitor and deepen, with ease and rigor, the course of its population from kindergarten to university.

Through MOE, a Business Intelligence platform built from scratch and aggregating three applications

(questionnaires, indicator viewer and back office), Municipalities will be able to quickly access to educational indicators cataloged by theme, indicator, periodicity, category and filter.

This tool allows you to create and provide questionnaires to the community, as well as to cross that information with data coming from the management platforms SEI and SIGA and present this data by time period.

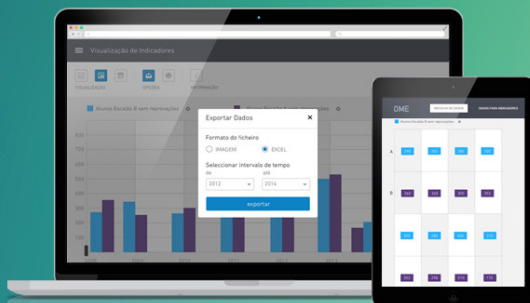

Indicators display

- Grouping indicators
- Application and combination of filters
- Visual analysis of data
- Timeline access

Backoffice Management

- Creation of indicators
- Importing external data
- Exporting data to Excel
- Possibility of statistical analysis of data in programs such as SPSS

Questionnaires

- Intuitive interface
- Custom Templates
- Complex response scenarios
